JECT Preparation of Requested Information on Air Pollutant Emission Notice

TO
Dominick Sanchini
President
Rockwell International, AERO, RFP

The Colorado Department of Health (CDH) has issued an Air Pollutant Emission Notice (APEN) which requests information concerning the Building 771 incinerator. Since certain information can be requested under the air permit which CDH issued for the incinerator, the U S Department of Energy (DOE) hereby directs you to prepare the information requested in the attached letter, in the requested format, and to submit the package with cover letter to this office no later than June 28, 1989. The DOE will then forward appropriate information to the CDH.

The DOE is aware of CDH's use of the term, "contaminated waste" to describe what is burned in the 771 incinerator and does not agree that the materials are indeed wastes. We can, however, provide information regarding the fuel usage and the typical contents and volume of materials sent through the incinerator in order to show compliance with permit requirements.

Questions concerning this request can be directed to Ms Candice Jierree of my staff at extension 4888.

Ralph E. Erickson
for Edward S. Goldberg
Acting Area Manager
